Almonds

Did you know?

- Almonds, like most nuts, are an excellent source of protein.
- Almonds contain healthy monounsaturated fats.
- Almonds are a good source of vitamin E, calcium, and riboflavin.

Fun Fact!

California is the only state that produces almonds commercially.

Additional Information

- The United States is the world’s leading almond producer.
- Store almonds in a cool, dry place for longer shelf-life.
- There are over 40 varieties of almonds grown.
- Spanish explorers introduced almonds to the United States.

Anchovies

Did you know?

- Anchovies are a good source of protein.
- Anchovies are high in vitamins such as vitamin A, C, E, folate, and riboflavin.
- With a large amount of polyunsaturated fats, anchovies can help lower cholesterol.

Fun Fact!
Anchovies have a fifth taste sensation known as “umami” (uˈmaːmi).

Additional Information

- Always cook anchovies before eating to prevent foodborne illness.
- Anchovies can help in maintaining healthy skin.
- Anchovies average 1 to 4 inches in length.
- There are over 20 different kinds of anchovies.

MyPlate suggests choosing lean or low-fat meat and poultry choices.

**Fried Anchovies with Dried Peanuts**

2 tablespoons peanut oil  
1 cup dried small anchovies  
1 cup raw peanuts  
1 teaspoon caster (superfine) sugar  
½ teaspoon salt  
½ teaspoon chili powder  

Wash hands and work area before cooking. Heat oil in a wok and fry anchovies over medium heat until pale brown. Remember they will continue to darken even after being removed from the heat. Lift out with a slotted spoon and drain on paper towels. Fry the peanuts in the oil until golden brown, lift out and drain. Mix sugar, salt and chili powder and sprinkle over the combined fish and peanuts, tossing well. Cool and serve.

Fill the plate below with drawings of your favorite protein food sources.
Did you know?

- Catfish is an excellent source of omega-3 and omega-6 fatty acids.
- Catfish are a good source of protein.
- Catfish is an abundant source of phosphorus.

Fun Fact!

There are four popular types of catfish in Texas: Bluecat, Channel Cat, Flathead Cat, and Bullhead.

Additional Information

- Catfish is the leading produced fish product in America.
- In the United States, the average person eats about one pound of catfish each year.
- Catfish should be cooked to an internal temperature of 145°F before consumption.
- Go for grilled or baked catfish rather than fried catfish.
Catfish Stew and Rice

2 medium potatoes
1 14 ½ ounce can cut tomatoes
1 cup chopped onion
1 cup clam juice
1 cup water
2 minced garlic cloves
½ coarsely chopped head of cabbage
1 pound catfish fillets
Sliced green onion (as needed)
1½ tablespoon chili and spice seasoning
2 cups cooked brown rice

Wash hands and work area before cooking. Peel potatoes and cut into quarters. In large pot, combine potatoes, tomatoes and their juice, onion, clam juice, water, and garlic. Bring to boil and reduce heat. Cook covered over medium-low heat for 10 minutes. Add cabbage and return to boil. Reduce heat. Cook covered over medium-low heat for 5 minutes, stirring occasionally. Meanwhile, cut fillets into 2-inch lengths. Coat with chili and spice seasoning. Add fish to vegetables. Reduce heat and simmer covered for 5 minutes or until fish flakes easily with fork. Serve in soup plates. Garnish with sliced green onion, if desired. Cook brown rice according to directions on box. Serve with scoop of hot cooked rice. *Reduce the sodium by using low- or no-added-sodium canned tomatoes.

Did you know?

- Chicken is one of the best sources of protein.
- Chicken consumption is roughly 83 pounds per person, the most of any meat in the United States.
- Chicken is an excellent source of niacin, selenium, and phosphorus.

Fun Fact!

Texas ranks sixth in chicken production in the United States.

Additional Information

- When purchasing chicken, look for a creamy white to deep yellow color.
- Avoid chicken that has a distinct odor.
- Chicken is a white meat that has less saturated fat and cholesterol than red meat.
- Chicken should be cooked to an internal temperature of 165°F.
Baked Chicken with Vegetables

4 sliced potatoes  
6 sliced carrots  
1 large onion, quartered  
1 raw chicken, skin removed, cut into pieces  
½ cup water  
1 teaspoon thyme  
½ teaspoon pepper  

Preheat oven to 400°F. Place potatoes, carrots and onions in a large roasting pan. Put chicken pieces on top of the vegetables. Mix water, thyme and pepper. Pour over chicken and vegetables. Spoon juices over chicken once or twice during cooking. Bake at 400°F for one hour or more until browned and tender.

Did you know?

- Cod is a type of fish that is high in lean protein.
- Cod is an excellent source of vitamin B₁₂!
- Cod is a good source of potassium.

Fun Fact!

Cod are predominately caught in Alaskan water.

Additional Information

- Atlantic Cod and Pacific Cod are both served in the United States.
- Cod consumption reaches about a half pound per person each year.
- Cod, like all fin fish, should be cooked to an internal temperature of 145°F.
- Cod may contain mercury and should be limited in pregnant women.
Simple Fish Tacos

½ cup non-fat sour cream
¼ cup fat-free mayonnaise
½ cup fresh chopped cilantro
½ package low-sodium taco seasoning
1 pound x 1 inch pieces cod fillets
1 tablespoon olive oil
2 tablespoons lemon juice
2 cups shredded red and green cabbage
2 cups diced tomatoes
12 six inch corn tortillas
Lime wedges

Wash hands and work area before cooking. In a small bowl, combine sour cream, mayonnaise, cilantro, and 2 tablespoons seasoning mix. In a medium bowl, combine cod, vegetable oil, lemon juice, and remaining seasoning mix; pour into large skillet. Cook stirring constantly, over medium-high heat for 4-5 minutes or until cod flakes easily with a fork. Fill warm tortillas with fish mixture. Top with cabbage, tomato, sour cream mixture, lime wedges, and taco sauce

Did you know?

- For its size, an egg is one of the most nutrient dense foods available.
- An egg contains 13 essential nutrients.
- Eggs naturally contain vitamin D and are also high in iron.

Fun Fact!
The United States produces about 75 billion eggs every year!

Additional Information

- Iowa is the leading egg producer in the United States.
- Egg whites are used in shampoos, conditioners, soaps, and other skin care products.
- Hens can lay multiple eggs every day.
- Eggs need to be cooked until their yolk and white are firm.
Banana Bread

3 large bananas
1 egg
2 tablespoons vegetable oil
1/3 cup milk
1/3 cup sugar
1 teaspoon salt
1 teaspoon baking soda
1/2 baking powder
1 1/2 cup flour

Wash hands and work area before cooking. Preheat the oven to 350°F. Peel the bananas. Put them in a mixing bowl. Mash the bananas with a fork. Add the egg, oil, milk, sugar, salt, baking soda, and baking powder. Mix well with the fork. Slowly stir the flour into the banana mixture. Stir for 20 seconds until the flour is moistened. Lightly grease the bread pan with a little oil or cooking. Pour the batter into the bread pan. Bake for 45 minutes until a toothpick inserted near the middle comes out clean. Let the bread cool for 5 minutes before removing it from the pan.

Haddock

Did you know?

- Like most fish, Haddock are an excellent source of protein.
- Haddock has no carbohydrates and is low in fat.
- Haddock are a good source of vitamin B₁₂.

Fun Fact!

Haddock are sometimes referred to as “Scrod.”

Additional Information

- When cooked, Haddock has a slightly sweet taste with firm yet tender meat.
- Haddock is sold as fresh, frozen, and value-added.
- Haddock should be cooked to 145°F or until flesh is opaque and separates easily with a fork.
- Canada, Iceland, and Norway are among the top producers of Haddock.
Dilled Fish Fillets

1 pound frozen haddock or cod fillets
1 tablespoon lemon juice
⅛ teaspoon dried dill weed
⅛ teaspoon salt
1 dash black pepper (optional)

Wash hands and work area before cooking. Thaw frozen fish in refrigerator overnight or thaw in microwave oven. Then, separate into 4 fillets or pieces. Place fish in a glass-baking dish. Cover with wax paper. Cook at "medium" power in the microwave for 3 minutes. Remove cover, turn fish over, and sprinkle with lemon juice and seasonings.

Cover and continue cooking at "medium" power for 3 minutes or until fish flakes with a fork.

Did you know?

- Ham comes from the leg or shoulder of pigs.
- Ham is a good source of protein and thiamin.
- Ham comes in three forms: fresh, cured, cured-and-smoked.

Fun Fact!

67% of Americans serve ham at their Easter dinners.

Additional Information

- Fresh ham should be cooked to 160°F internally before eating, and pre-cooked ham to 140°F.
- The usual color for fresh ham is pale pink or beige.
- Ham is high in selenium and phosphorus.
- To preserve texture and flavor, wrap ham in freezer paper and store in freezer for no longer than 2 months.
Oriental Rice

1 tablespoon vegetable oil
2 beaten eggs
3 ½ cups cooked brown rice (or white rice)
1 cup chopped ham (or chicken breast or pork)
1 cup cooked, chopped mixed vegetables
2 sliced green onions
Soy sauce or hot sauce to taste (optional)

Wash hands and work area before cooking. Heat pan. Add 1 teaspoon of oil. Add eggs and scramble. Remove cooked eggs and set aside. Add the rest of oil (2 teaspoons) to pan. Stir fry rice, breaking up lumps by pressing rice against pan. Add leftover meat and/or vegetables. Stir fry until heated. Add green onions, reserved eggs and sauce to taste. Serve hot. Cover and refrigerate leftovers within 2 hours.

Lentils

Did you know?

- Lentils are a good source of fiber and protein.
- Lentils contain healthful complex carbohydrates.
- Lentils are high in folate, iron, potassium, and thiamin.

Fun Fact!
Lentils come in several colors including black, green, red, and yellow!

Additional Information

- Lentils are mainly grown in eastern Washington, northern Idaho, and western Canada.
- Lentils are seeds that grow in pods shaped like flat disks.
- Lentils are a type of legume.
- Avoid lentils that are misshapen, dented, or dried out.
Lentil Chili

½ pound ground beef
1 ½ cups chopped onion
1 crushed clove garlic
2 cups cooked lentils, drained
29 ounces diced or crushed tomatoes
1 tablespoon chili powder
½ teaspoon ground cumin (optional)

Wash hands and work area before cooking. In a large saucepan, brown beef over medium-high heat, breaking it into bite sized pieces. Drain fat. Add onion and garlic until softened. Add lentils, tomatoes, chili powder, and cumin. Cook for about 1 hour until flavors are blended. Serve hot, topped with your favorite chili toppings.

Did you know?

- Peanut butter and peanuts are similar in their nutrition benefits.
- Peanut butter is a good source of protein and potassium!
- Peanut butter has high levels of heart healthy unsaturated fats.

Fun Fact!

November is National Peanut Butter Lovers Month.

Additional Information

- Like all plant-based foods, peanut butter contains no cholesterol.

- Peanut butter production is the leading use of peanuts in the United States.

- A 12 ounce jar of peanut butter is made by about 540 peanuts.

- Peanut butter should be stored in a dry place that has a constant temperature.
Three-Grain Peanut Bread

1 cup flour
½ cup quick cooking oatmeal
½ cup cornmeal
½ cup non-fat dry milk powder
½ cup sugar
1 tablespoon baking powder
¾ teaspoons salt
2/3 cups peanut butter
1 egg
1 ½ cup non-fat milk

Wash hands and work area before cooking. Preheat oven to 325°F. Combine dry ingredients in a large bowl. Using two knives, cut peanut butter into dry ingredients until it appears coarse and crumbly. In a small bowl, beat together egg white and milk. Add to dry ingredients and mix well. Spread mixture into a greased loaf pan. Bake at 325°F for 1 hour and 10 minutes. Did you know?

- Pecans contain more than 19 vitamins and minerals!
- Pecans are a good source of antioxidants.
- Pecans are high in heart healthy monounsaturated and polyunsaturated fats.

Fun Fact!

The pecan tree is the official state tree of Texas!

Additional Information

- Pecans are grown across all areas in Texas.
- The United States produces about 80 percent of the world’s pecan supply.
- Store pecans in the freezer for up to two years.
- Pecans are a good source of dietary fiber.
Apple Coffee Cake

5 cups cored, peeled, chopped apple
1 cup sugar
1 cup dark raisins
½ cup chopped pecans
¾ cup vegetable oil
2 teaspoons vanilla
1 beaten egg
2 ½ cups sifted all-purpose flour
1 ½ teaspoon baking soda
2 teaspoons ground cinnamon

Preheat oven to 350°F. Lightly oil a 13x9x2 inch pan.
In a large mixing bowl, combine apples with sugar, raisins, and pecans; mix well. Let stand 30 minutes.
Stir in oil, vanilla, and egg. Sift together flour, baking soda, and cinnamon; stir into apple mixture about 1/3 at a time, just enough to moisten dry ingredients.
Turn batter into pan. Bake 35-40 minutes. Cool cake slightly before serving.

Did you know?

- Pork is the world’s most widely eaten meat!
- Pork is a good source of thiamin, niacin, and Vitamin B6.
- Cuts of pork with the word “loin” in them are the leanest and have the most nutritional value.

Fun Fact!

One hog represents 371 servings of pork!

Additional Information

- Pork production began in China in 4,900 B.C.
- Pork is classified as a white meat.
- Pork should be cooked to a temperature of 160°F to prevent illness.
- Pork is the most versatile meat - it can be marinated, dry rubbed, roasted, microwaved, grilled, skewered, pan-fried, stir-fried, boiled, barbecued, and baked.
Honey Mustard Pork Chops

4 top-loin pork chops
1/3 cup orange juice
1 tablespoon soy sauce
2 tablespoons honey mustard

Wash hands and work area before cooking. Put the pork chops in a large non-stick skillet. Cook over medium-high heat to brown one side of the pork chops. Use the spatula to turn the chops. Add the rest of the ingredients and stir. Cover the pan and lower the heat. Simmer 6 to 8 minutes until the chops are done.

Did you know?

- Salmon is high in protein and vitamin D.
- Salmon is a great source of omega-3 fatty acids.
- Salmon contains vitamins A, D, B₆, B₁₂, niacin, and riboflavin.

Fun Fact!

Salmon can survive in both freshwater and saltwater, making them anadromous!

Additional Information

- Look for bright, firm, orange-pink flesh in fresh salmon.
- Cook salmon to 145°F or until flesh is opaque and separates easily with a fork.
- There are 6 commonly eaten types of salmon in the United States: Atlantic, Chinook, Chum, Coho, Pink, and Sockeye Salmon.
- Salmon is the third most consumed seafood in the United States behind shrimp and canned tuna.
Salmon Patties

1 15 ½ ounce can boneless salmon, drained
1 cup crushed whole grain cereal or crackers
2 lightly beaten large eggs
½ cup 1% milk
⅛ teaspoon black pepper
1 tablespoon vegetable oil

Wash hands and work area before cooking. Use a fork to flake salmon until very fine. Crumble cereal or crackers into crumbs. Add cereal or cracker crumbs, eggs, milk, and pepper to salmon. Mix thoroughly. Shape into 9 patties. Heat oil in a skillet. Over medium heat, carefully brown both the sides until patty is thoroughly cooked.

Scallops

Did you know?

- Scallops are low in fat and a good source of protein!
- Scallops are high selenium and vitamin $B_{12}$
- There are over 40 different kinds of scallop produced worldwide.

Fun Fact!

Scallops are classified as mollusks.

Additional Information

- Scallops are usually five inches in length or more.
- Scallops are available year round.
- When cooked, scallops should be an opaque white with a firm texture.
- Scallops begin as plankton and then mature into adult scallops.
Lemon and Garlic Pasta with Pan-Seared Scallops

3 medium green peppers cut into 1½ inch squares
1½ pounds fresh bay scallops
1 pint cherry tomatoes
1/4 cup vegetable oil
3 tablespoons lemon juice
Dash of garlic powder
Black pepper to taste

Wash hands and work area before cooking. Parboil green peppers for 2 minutes. Alternately thread first three ingredients on skewers. Combine next four ingredients. Brush kabobs with oil/lemon mixture, place on grill (or under broiler). Grill 15 minutes, turning and basting frequently

Fill the plate below with drawings of your favorite protein food sources.
Did you know?

- Shrimp is high in vitamin D, niacin, and zinc.
- Shrimp contains antioxidants that help protect the skin from premature aging.
- Shrimp are made of almost entirely protein and water.

Fun Fact!

A shrimp’s heart is located in its head!

Additional Information

- Shrimp is the most frequently eaten seafood in the United States.
- Shrimp should be cooked until the flesh is opaque.
- Shrimp have many different types: cold water, warm water, wild, farmed, domestic, and imported.
- On average, people eat about 4 pounds of shrimp per year.
Spicy Shrimp Omelette

3 teaspoons extra virgin olive oil
1 tablespoon chili garlic sauce
½ cup peeled shrimp, chopped
½ cup red bell peppers, thinly sliced
4 egg whites
2 whole eggs
4 tablespoons water
Dash of freshly ground black pepper
Pinch of salt

Wash hands and work area before cooking. In a non-stick frying pan, heat chili garlic sauce and 2 teaspoons extra virgin olive oil. Add shrimp and bell peppers and cook until nearly done. Beat eggs and egg whites with water and salt and pepper in a small bowl. Mix 1 teaspoon olive oil with shrimp and bell peppers and pour in egg mixture. Cook until egg is set. Turn omelet over once. Transfer omelet onto a plate and garnish as desired.

Fill the plate below with drawings of your favorite protein food sources.
Did you know?

- Tuna is abundant in lean protein.
- Tuna is a superb source of vitamin B₁₂, vitamin D, calcium, and iron.
- Tuna is one of the best sources of omega-3 fatty acids.

Fun Fact!

Americans eat over one billion pounds of canned and/or pouch tuna every year!

Additional Information

- Pregnant women should consume no more than 300 grams of albacore (canned) tuna per month.
- Choose fresh tuna that smells ocean-fresh and has a glossy appearance.
- Tuna can swim up to 40 mph.
- Tuna is most popular in Japan and the United States.
Quick Tuna Casserole

4 cups water
5 ounces wide egg noodles
10 ounces low-sodium cream of mushroom soup
1/3 cup skim milk
6 1/2 ounces canned drained tuna in water
1 cup frozen green peas
1 cup fresh bread crumbs

Wash hands and work area before cooking. Preheat oven to 350°F. Bring 1 quart of water to a boil in a large pot and cook the egg noodles in the water for 2 minutes. Then, cover the pot, remove from heat and let stand for 10 minutes. In the meantime, mix the soup and milk together in a bowl. Combine tuna and peas with the mixture and pour into a 1-quart casserole dish. Drain the noodles well and combine with the tuna mixture. Sprinkle the top with bread crumbs. Bake for 30 minutes.

Did you know?

- Turkey is an exceptional source of protein.
- About 46 million turkeys are eaten each Thanksgiving!
- Turkey is high in iron, zinc, phosphorus, and potassium.

Fun Fact!

The heaviest turkey ever raised was 86 pounds!

Additional Information

- Turkey can be sold whole, as sausage, tenderloins, and deli meats.
- Turkeys, like humans, can see color.
- Turkeys have two different types of meat: white and dark meat.
- Turkey should be cooked to an internal temperature of 165°F.
Turkey Patties

1¼ pound ground turkey
1 cup bread crumbs
1 egg
¼ cup chopped green onion
1 tablespoon prepared mustard
½ cup chicken broth
Non-stick cooking spray

Wash hands and work area before cooking. Mix ground turkey, bread crumbs, egg, onions, and mustard in a large bowl. Shape into 4 patties, about ½ inch thick. Spray a large skillet with cooking spray. Add patties and cook, turning once to brown other side. Cook until golden brown outside and white inside, about 10 minutes. Remove. Add chicken broth to skillet and boil over high heat until slightly thickened, about 1 to 2 minutes. Pour sauce over patties.
