

Understanding Traffic Signs

Optional Activity

This activity can be used as a post-test for the *Understanding Traffic Signs* presentation.

Materials:

1. Three sets of 5-10 photos of various signs in your community, or use photos of signs from the internet.
2. Black electrical tape
3. Three sets of cards naming the signs seen in the photos.

Prior to the Presentation: Use the black electrical tape to cover any words or symbols on the signs leaving only the color and shape of the sign visible.

Activity:

Divide the group in to three smaller groups. Give each group an identical set of photos and sign cards. The sets should be kept separate and in random order. Give each group two minutes to correctly match the photos and sign cards. At the end of two minutes, review the correct answers and declare a winner.
